Team Name: sdmay24-24
Team Members: Jacob Elliot, Julia Falat, Joseph Hansen, Logan Kinch, Viola Newman, Chris Penne
Report Period: Oct 9-Oct 22

Summary of Progress in this Period

Met up as a group to discuss the baseline of our design in a flow diagram. Began looking at components online to start figuring out pricing and figuring out what we want to start testing this next week or two.

Pending Issues

Discuss some specifics we need to ask the client and set up a time slot for our group presentation at the end of the semester.

Plans for Upcoming Reporting Period

Hopefully start testing some circuitry to understand the different components. This will allow us to design the best circuit.
